

RussSpec is aimed at ARCHITECTS and SPECIFIERS who require detailed roofing specification clauses. Each RussSpec gives clauses that comply with the recommendations of British Standards, Codes of Practice, building regulations and cover the Russell range of tiles and accessories. Roofs designed and installed in accordance with RussSpec are covered by the 15-year RussSpec Guarantee.

RussSpec

A RussSpec, in conjunction with a site specific roof tile Fixing Specification, provides the assurance of correct detailing of the roof, accessories, fixings, ventilation, battens and underlay all in one comprehensive specification. Roofs fixed and built in accordance with the RussSpec are covered by a 15-year design liability guarantee.

Products must be installed using normal standards of good workmanship and should meet the requirements of the British Standards for slating and tiling (BS 5534:2014 and BS 8000-Part 6). Substitution of Russell components with other products at any stage of construction will invalidate the guarantee.

How to obtain a RussSpec

To obtain a RussSpec for a project just complete and submit the RussSpec form and the technical department will do the rest.
